

DATA GRID GAME

Data grid game to understand data table.

Materials needed:

You can use the toys you have or our cards.

How to Play?

- Create a grid using masking tape on the floor (rows and columns, just like a spreadsheet or database). Fill each cell with a toy, sticker, or number. Then ask questions like:
 - "What's in row 2, column 3?"
 - "Can you find all the animals in row 1?"
 - "Which column has only blue items?"
 -
- Let them add or remove objects to simulate how databases are updated.

Coding meets puzzle time!
